

### WE CERTIFY PATIENTS FOR MEDICAL MARIJUANA

In order to apply for the South Dakota Medical Marijuana Program, patients must meet the following requirements:

- Be 18 years of age or older
- Patients under 18 years of age must have parental consent. Parent or legal guardian must also serve as designated care giver and control the use of medical cannabis.
- Have a current diagnosis of a qualifying condition (see below)
- Be a South Dakota resident with proof of residency (valid South Dakota driver's license or state ID card)

Debilitating medical conditions for the medical use of cannabis include chronic conditions or treatment of a medical condition that produce:

- Cachexia or wasting syndrome (e.g. HIV/AIDS)
- Severe, debilitating pain
- Severe nausea (e.g. cancer/chemotherapy)
- Seizures (e.g. epilepsy)
- Severe and persistent muscle spasms, including those characteristic of Multiple Sclerosis (MS)

Patient must submit medical records to the clinic prior to appointment. The most common types of medical records provided are from:

- Sanford MyChart (Sanford App on Your Phone)
- Follow My Health
- AveraChart (Avera App on Your Phone)
- My Health Vet (VA)
- Other treatment notes, letters, or referrals from your current physician, chiropractor, or other provider.

**Ask the Motor Medics**  
*Automotive Advice from The Under the Hood® Show*

Dear Motor Medics,  
My name is Clarence I live in Entiat WA, and I listen to your Under The Hood show on podcast. I am rebuilding a 2.0 Liter engine out of a 1976 VW bus. This engine is a solid lifter engine and I've heard I need to use a Zink additive to protect the engine but is there anything other than good oil that will help extend the life of my rebuild? It's an air-cooled engine so it does run a little hotter than your normal car engine. Thanks for the show, I enjoy it very much. I recently found it on radio and I'm 1/2 way through the archived podcasts and look forward to my drive to work every day to be able to listen to the show.

Clarence in Entiat Washington

Dear Clarence,  
Those old VW engines were fun to work on. We still get a fair amount of email and calls about them. You are right on track with the zinc additive or the ZDDP replacement additive. All engines can benefit from the high-pressure wear protection that the ZDDP additive provides but in the case of older engines without roller camshafts like the ones found in this VW and older hot rods and collector cars it is a must or parts like the camshaft will wear quickly and can destroy the engine. The additive found at parts stores and a good quality oil should help it to last.

Take care, the Motor Medics

Dear Motor Medics,  
Hello gents. I've been listening to your Under The Hood radio show podcast down here in Australia for a few months now and figured I've got nothing to lose by contacting you. I have a 1997 BMW E36 323i with 172,000km. My problem is I have no hot air from the heater. Only ambient temperature or ice-cold air conditioning. Can you help me? It gets mighty cold down here. Thanks heaps guys!

Jason in Werribee Victoria Australia

Dear Jason,  
Thanks for listening down there! For some reason we here in the states don't always think about how cold it gets in Australia but we're sure you do with no heat. Even though you have a BMW, and the steering wheel is on the other side of the dash, the problem you have is relative to all cars. You need to have hot water running through the heater core and air directed through it without bypassing so that it warms the interior. Our first step is to verify the engine thermostat keeps the engine at proper temp and if not, you must fix that first. Second, make sure the air door opens and closes in the dash. This can take a little you tube research to find and check. Third, the core needs to be clean. You can try to flush it with a garden hose both directions several times and if that helps, it indicates you have a restricted core.

Take care, the Motor Medics
