Royal Family Kids Camp stages 25-cent event

Proceeds from a 25-cent event from 10 a.m.-2 p.m. Saturday, April 6 at Active Generations, 5500 E. Generations pl., Sioux Falls, will benefit Royal Family Kids Camp.

Paddles will be available for purchase. The first is \$15 and additional paddles are \$10. There is also a golden paddle for \$50.

Doors open at 9:30 a.m. and lunch will be provided.

Curious how a 25-cent event works? Upon arrival, attendees will receive one-plus numbered paddle(s). Auction items will be on display with a bid price of one, two, three or four quarters. As the items come up for bid, attendees can bid by putting quarter(s) in the bowl at each table. Those who choose to bid will hold their paddle in the air, and if the auctioneer selects your number from the bucket of number chips, you win the item. If your number is selected and you did not bid on the item, a chorus of "boos" will be heard.

Register for MCAP summer kids camp

Registrations for the Mighty Corson Art Players summer kids camp are now being accepted. The camp, set for June 10-14, will take place at the Corson Playhouse. Throughout the week, campers will rehearse an original story, "A Night in the Woods," written by local playwright H.E. Dunkle. This fairy-tale-esque story follows Amber, a young girl lost in the magical woods full of talking animals as an evil wizard schemes to trap her in the forest forever. Discover the secret of this enchanted realm as Amber and her new friends challenge Horace the Heartless and escape from his curse.

The camp culminates with a production of "A Night in the Woods" Saturday afternoon, June 15.

The camp is for kids in grades K-6. The fee is \$65 per child, and slots are available for up to 20 participants per session. Morning sessions are 9-11:30 a.m. and the afternoon sessions run from 1-3:30 p.m. Registration closes May 27.

Ask the Motor Medics®

Automotive Advice from The Under the Hood® Show

Dear Motor Medics,
I have a 2021 Ram 1500 with a V6 engine that has a ongoing coolant leak. The leak is small and coming from the thermostat housing area. I have had the truck repair several times with both the thermostat, water pump, and then thermostat housing being replaced. The leak consumes about a pint of coolant a month. Can I use one of those cooling system sealers to fix it? I don't want to clog up the system trying to stop a leak. If I use it, how long does it last?

Gary in Litchfield Minnesota.

Dear Gary,
We have seen this leak on multiple ram trucks in the past few years. There have been upgraded thermostat housings and thermostat covers which should fix this issue but in the colder climates we have seen multiple repeat failures. If it is still under warranty take it back to the shop that serviced it. If it is out of warranty, or you performed the work yourself and are tired of trying to seal up that small remaining leak then a sealer may be the ticket. We have had great success with a permanent leak sealer called KSeal. KSeal does not clog the system and is meant to be a permanent repair that you add to the system and leave in. Don't use it with other sealers and don't flush it out. Follow directions and if you have the results that we have seen it should stop the leak.

Take care, the Motor Medics.

Dear Motor Medics,
I'm rolling in my 2019 Toyota Corolla with custom aftermarket wheels and tires and custom vehicle wrap. Can you picture it? This thing is hot! Well, as hot as a Corolla can get. This is what I could afford as a new car when I purchased it right out of college, but it beats huge payments and I like it a lot. I have been having tire Pressure Monitor issues and the tire stores say its my car. The issue started a year after the new wheels and tires were installed and they have replaced all the sensors and can't get the system to work. Do you have any ideas?

Thank you, Kenedy in Omaha Nebraska.

Dear Kenedy,
Another Corolla with TPMS issues. This does not surprise us much. Usually, tire pressure monitor issues are a straight-forward repair. We scan the system to see which tire does not communicate with the receiver or which one is showing a fault then replace that sensor in the tire with a new one, program it, and its good to go. With the Toyotas and Lexus vehicles we have not been that lucky at our shop. We have tried several brands of aftermarket sensors and even used 4 new Toyota sensors and have had a very hard time programing them. For these vehicles use only Toyota OEM sensors and we suggest the dealership for programing. This has been the most successful for us.

Take care, the Motor Medics.
