Automotive Advice from The Under the Hood® Show

Dear Motor Medics,
My name is Clarence I live in Entiat WA, and I listen to your Under The Hood show on podcast. I am rebuilding a 2.0 Liter engine out of a 1976 VW bus. This engine is a solid lifter engine and I've heard I need to use a Zink additive to protect the engine but is there anything other than good oil that will help extend the life of the rebuild? It's an air-cooled engine so it does run a little hotter than your normal car engine. Thanks for the show, I enjoy it very much. I recently found it on radio and I'm half way through the archived podcasts and look forward to my drive to work every day to be able to listen to the show.

Clarence in Entiat Washington.

Dear Clarence,
Those old VW engines were fun to work on. We still get a fair amount of email and calls about them. You are right on track with the zinc additive or the ZDDP replacement additive. All engines can benefit from the high-pressure wear protection that the ZDDP additive provides but in the case of older engines without roller camshafts like the ones found in this VW and older hot rods and collector cars it is a must or parts like the camshaft will wear quickly and can destroy the engine. The additive found at parts stores and a good quality oil should help it to last.

Take care, the Motor Medics.

Dear Motor Medics,
Hello gents. I've been listening to your Under The Hood radio show podcast down here in Australia for a few months now and figured I've got nothing to lose by contacting you. I have a 1997 BMW E36 323i with 172.000km. My problem is I have no hot air from the heater. Only ambient temperature or ice-cold air conditioning. Can you help me? It gets mighty cold down here. Thanks heaps guys!

Jason in Werribee Victoria Australia.

Dear Jason,

Thanks for listening down there! For some reason we here in the states don't always think about how cold it gets in Australia but we're sure you do with no heat. Even though you have a BMW, and the steering wheel is on the other side of the dash, the problem you have is relative to all cars. You need to have hot water running through the heater core and air directed through it without bypassing so that it warms the interior. Our first step is to verify the engine thermostat keeps the engine at proper temp and if not, you must fix that first. Second, make sure the air door opens and closes in the dash. This can take a little you tube research to find and check. Third, the core needs to be clean. You can try to flush it with a garden hose both directions several times and if that helps, it indicates you have a restricted core.

Take care, the Motor Medics.

BRANDON VALLEY Journal

Has Brandon's population actually declined, or has it grown? Editor Jill Meier met with City Administrator Bryan Read in his response to *South Dakota News Watch* report printed in the July 3 *Brandon Valley Journal*.

A local carpet, flooring and duct cleaning business is under new ownership. Learn more about Brandon's newest business owners.

Angela Jones is the new Postmaster at the Brandon Post Office, and this week, the *Journal* introduces you to her.

The Brandon Boss Gobblers treated kids and staff to a day of fishing at Baum's pond last week, and we'll bring you to the shoreline of the feel-good endeavor in both words and photos.

A driver at Huset's Speedway has a unique story to tell, and Tom A. Savage shares that story with you.

Post 131 punched their ticket to the State A American Legion Baseball Tournament. Find out how they got there in a *BV Journal* sports report.

And, we'll have the details from Sunday's races at Huset's as well as the latest from the Valley Rats amateur baseball team in action.

Plus, there's a whole lot more. If you find yourself asking, "I wonder what's going on ..." it's time to subscribe to the *Brandon Valley Journal*! Give us a call at (605) 582-9999 to subscribe today so you, too, can be in the know.
