THE MIGHTY CORSON ART PLAYERS PRESENT
ALMOST MAINE
 October 11, 12, 18, 19 @ 7:30 pm. October 13, 20 at 2:30 pm

Welcome to Almost, Maine, a place that's so far north, it's almost not in the United States. It's almost in Canada. And it's not quite a town, because its residents never got around to getting organized. So it almost doesn't exist. One cold, clear, winter night, as the northern lights hover in the star-filled sky above, the residents of Almost, Maine, find themselves falling in and out of love in unexpected and hilarious ways. Hearts are broken. Hearts are mended. But the bruises heal, and the hearts mend—almost—in this delightful midwinter night's dream.

These sponsors thank our volunteer firefighters for keeping our communities safe!

National Fire Protection Association statistics show that in 2017 U.S. fire departments responded to 357,000 home structure fires. These fires caused 2,630 fire deaths and 10,600 fire injuries. On average, seven people died in a fire in a home per day during 2012 to 2016.

SMOKE ALARMS

- Working smoke alarms cut the risk of dying in a home fire in half
- Install smoke alarms in every sleeping room, outside each separate sleeping area and on every level of the home, including the basement.

COOKING

- Cooking is the leading cause of home fires and home fire injuries. Thanksgiving is the leading day for fires involving cooking equipment
- The leading cause of fires in the kitchen is unattended cooking

HEATING

- Heating equipment is one of the leading causes of home fires during winter months
- Space heaters are the type of equipment most often involved in home heating equipment fires
- All heaters need space. Keep anything that can burn at least 3 feet (1 meter) away from heating equipment.
- Have a 3-foot (1-meter) "kid-free zone" around open fires and space heaters.
- Purchase and use only portable space heaters listed by a qualified testing laboratory.
