Ask the Motor Medics®
Automotive Advice from The Under the Hood® Show

Dear Motor Medics,

I recently heard you talking about timing belts on your radio show and how everyone with a vehicle should find out if theirs is equipped with one and what the recommended service interval was. I asked my local shop if I had one and they said I do and in fact it was past due by almost 10,000 miles. My vehicle is a 2003 Honda Accord. I have owned it since new, and have never had it changed to my knowledge unless it was part of some service package. Is a timing belt something I can do myself at home with basic hand tools? I have changed other belts. If I don't do it the correct way, can I damage something or can I just take it to a shop to have them finish it?

Craig in Kittanning, Pennsylvania.

Dear Craig,

Yes, a timing belt can be changed at home on many vehicles, but specialty tools are required for some. Before you start any home project make sure you are very familiar and comfortable with the job ahead of you and follow all safety procedures. A timing belt is a job that requires very close attention to procedure. If the belt comes loose or is not installed correctly and the engine becomes out of time it can spell disaster for the engine. It can even mean having to replace the engine in some cases. Study the job closely before attempting this one.

Take care, the Motor Medics

Dear Motor Medics,

I'm getting ready to send my son off to college in a cheap car we found. We had a used car inspection done before we purchased it and a couple items were found that we took care of after the purchase ourselves. My son and I have spent a lot of time together doing small mechanical projects and I think he can take care of the small things that may come up on his own while he is away. For anyone who may be traveling away from home what kinds of items do you suggest to have stored in the vehicle for small emergencies?

Robert in Holdrege, Nebraska.

Dear Robert,

If you're a well-seasoned mechanic or everyday driver having an emergency kit in the vehicle is a great idea. Even If you don't use it yourself it may come in handy for others you come across. Everyone will have a different idea and some personal choices but here are some basics. Jumper cables for sure, a small empty fuel can to prevent spills, a fire extinguisher and basic hand tools; a small basic kit does not take up much room and can be used for many repairs. A flashlight with extra batteries and some type of signal to warn people if you are disabled in the dark like an illuminated triangle set. These are all in addition to the vehicle's jack and tool kit and any other items that you have.

Take care, the Motor Medics
