Ask the Motor Medics®

Automotive Advice from The Under the Hood® Show

Dear Motor Medics,
I'm about ready to start hauling my trailer for the winter snowmobile season and will be using more than one vehicle. What kind of things should I be thinking about before heading out with a trailer?

Thanks, Joanne in Madison Wisconsin

Dear Mike,
I'm glad that you're thinking ahead. Too many people just assume the vehicle they have is ready just because it has a hitch on the back. The first place to start is to make sure what you are pulling can safely be towed without overloading your vehicle, once that it done a safety inspection is in order. All the items that the vehicle needs to operate such as steering, brakes, cooling, etc. will now be done for two so if it can't handle itself how will it handle towing? Have the vehicle raised on a hoist to check the suspension and brakes, replace worn parts for safety. Check the tires and make sure they are properly inflated and not cracked. Also check their load rating. Check the condition of the hitch and light wiring and inspect your engine and transmission cooling systems. Dirt and debris should be rinsed away from the cores with low pressure water. If you do not have a transmission cooler ask your mechanic about one, it may save you from having a transmission replaced prematurely. Don't forget to check the trailer for safety as well. Be sure to ask your mechanic about further towing preparations.

Take care, the Motor Medics

Dear Motor Medics,
Last year I spent almost $2000.00 on air conditioning repairs to my 2014 GMC Suburban. They just said it had a complete failure and that's the way it is. They did not offer any maintenance advice. We usually keep our vehicles just until the warranty is about to expire then trade, but with a budget minded focus lately we have decided to keep our vehicles longer. That money covers several payments, but we still feel it's cheaper in the long run to keep the vehicles a few more years. Is there anything we could have done to have possibly avoided this?

Thank you, Darrin in Nashville Tennessee

Dear Darrin,
Many people have decided to keep their vehicles longer and we think this is a good idea to save money. To make sure you avoid unexpected repairs as much as possible, find a good mechanic you can trust and get on a regular maintenance schedule. In our own shop we see many vehicles fail that would not have if the driver would have done some simple low-cost upkeep. In the case of air conditioning, it is important to inspect the system for visible oil leaks and repair them before further use of the system. It is also important to service cabin air filters and have the condenser cleaned as needed. Any leaks in the system or overheating due to dirt can be catastrophic. These simple checks can help you avoid costly repairs.

Take care, the Motor Medics
